

CarrierWatch

Enhanced Decimator D3 Spectrum Analyzer Monitoring Capabilities

View all your carriers at a glance:

- Up to 100 carriers in a single window
- Colors indicate when carriers are in alarm
- Display updates in real-time as the carriers are measured
- Zoom into a carrier to play back traces and view the trend plot

Zoom into a specific carrier

- The trace is displayed as an overlay on top of the multiple carrier display.
- A trend plot is available to show the carrier power over time so you can quickly spot any power fluctuations
- Alarm lines indicate when the carrier power has crossed the threshold
- Review previous traces from the trend plot history
- Playback traces to determine whether the power change was sudden or gradual
- Overview of the carrier specifications like expected power and measurement parameters such as span and resolution bandwidth

CarrierWatch - Key Features

The Display is Easily Configurable

- Easy to set up based on the carriers already defined in the monitoring plan
- Configure the display in multiple ways: show all carriers, show only alarmed carriers, or show a custom list of carriers
- The display can be set up to show all carriers in the monitoring plan
 - Highlighting indicates alarmed and nominal carriers
 - A one-button selection shows all carriers
- The display can be configured to show alarmed carriers only
 - The most recently alarmed carrier is automatically moved to the top-left corner of the screen
 - As carrier issues are resolved, the non-alarmed carriers are no longer shown on the display when the carrier reverts to a nominal state
 - At-a-glance view of the alarmed carriers includes the duration of the alarm so you know if it's a persistent or transient issue
- Focus on priority carriers by creating a custom list of carriers to display by selecting the carriers of interest from the monitoring plan
- Live display can be sized to look good on your monitor or on a large operations center screen
- Save different display configurations to project files for fast recall at a later time
- It can run as a standalone application or from within the web browser

Perfect Complement to Your Decimator D3 Real-time Monitoring and Generation of SNMP Traps and E-mail Alarm Notification

- Automated notifications occur while you watch the overview of all of the live carriers
- Save pictures of the overall view or a particular carrier to PNG files
 - Use to generate your carrier reports
 - Can be emailed to external carrier providers to highlight issues or indicate compliance to the carrier power over time

May be ordered as an option with new Decimators

All Decimator D3's are remotely upgradeable in the field with a license key
